Formed from the combination of over 30 years experience within the OEM supply chains for wire, cable, connectors and connectivity, C<sup>3</sup> offer their customers a wealth of knowledge and supply chain expertise.

The increase in today's global, competitive economy means businesses should now be focusing more and more on their core competencies, in order to increase their own competitiveness.

If managing the supply, storage, handling and kitting of wire, cable, connectors and MRM / IRM (Manufacturing related materials / Installation related materials) is not your core competency, but does form a vital part of your BOM, you could be inefficiently using a number of your most vital resources, TIME, SPACE and PEOPLE. All of which will have an impact on your company's key performance targets, not to mention it's profits.

C<sup>3</sup> specialise in providing focused supply chain solutions within their area of expertise, which allow their customers to concentrate fully on their core competencies and in doing so, make a positive impact on their core business.

### SERVICES:

The control of service and inventory costs is a major factor for the OEM and Wire Assembly Industry. C<sup>3</sup> offer a variety of solutions that target these areas:

- Consigned Inventory
- J.I.T
- Kan-Ban (Auto-replenishment)
- Kitting
- Cable, Connector and accessory audit
- Management and consolidation of customer owned inventory

### Technical Support Services:

- Wire, Cable, Connector and Gland design and engineering
- Product / Industry / Technical specialists
- Technical literature
- Application Engineering

### C<sup>3</sup>'s Product Portfolio:

#### Wire and Cable:

#### Control Cables:

- Flexible control cables – YY, CY, SY, LiYY, LiCY – All variants LSZH, PVC, PUR, etc
- UL/CSA & Din 47100 Control and Instrumentation
- Portable Cord, SJ00W, S00W, SYT, SJT, etc,
- High Temperature and Thermocouple cables

#### Industrial Applications:

- Industrial Automation – Flexible Motor and control cables for servo motor, encoder and resolver applications, i.e. Siemens, Indramat, Profibus, Devicenet etc;
- Dynamic & Robotic cables – UL/CSA, European and HAR products for drag chain and torsional flexing applications
- Temporary Power Markets – Gen Set cables i.e. Highly flexible power cables and industry standard H05 / H07, 638°TQ's, etc;

#### OEM & Wire Assembly:

- Mil Spec cables Military, Aerospace and avionic applications MIL16878, 22759 etc;
- UL hook-up wires 1007, 1015, 1061 etc;
- Building Wire CSA TEW, TFFN, THHN, etc;
- Automotive SAE J1128, 1560, 1127, SXL, GXL, TXL, Battery Cables.
- Ribbon cables, UL 2651, UL2678.

#### Connectors:

- Circular connectors for Industrial, servomotor and encoder applications.
- D' Sub connectors and backshells – M24308 Mil Spec standard and Industrial / Commercial
- Industrial Multipole and plug and socket ranges for automation and power applications

#### Glands:

- Extensive range of standard brass to specialist EMC glands suitable for applications ranging from commercial to military environments.

#### Heatshinks:

Complete range of 2:1 to 6:1 sleeves, reeled or pre-cut to your specification. Compounds suitable for Industrial / Commercial to Military (Mil-Spec) applications are covered by our range.
